ScriptSavvyHub Guide

Introduction

Welcome to ScriptSavvyHub, a repository for scripting enthusiasts and developers to collaborate and share useful scripts and utilities.

Table of Contents

1. Getting Started

2. Project Structure

3. Using Scripts

4. Contribution Guidelines

5. Contact Information

6. License

1. Getting Started

- Overview of the project's purpose and goals.

- Instructions on how to clone the repository.

- Prerequisites and setup required to run the scripts.

2. Project Structure

- Description of the directory structure within the repository.

- Explanation of the main components (src, docs, tests, etc.).

3. Using Scripts

- Detailed explanation of individual scripts available in the repository.

- Instructions on how to run the scripts.

- Examples and use cases for each script.

4. Contribution Guidelines

- How to contribute to the project.

- Coding standards, guidelines, and best practices.

- Explanation of the pull request process.

5. Contact Information

- Information on how to get in touch with maintainers or contributors.

- Links to relevant communication channels (e.g., email, Slack, Discord).

6. License

- Details about the license under which the project is released.

- Any additional legal information or disclaimers.
